Address:

No.78, Xinwan District, Jiangnan District, Wuhan, Wuhan

Price:

1.00 Dollar US\$

Moxa device server NPort 5610-8-DT

NPort 5600 Series

8-port RS-232 rackmount device server with RJ45 connectors and 100 to 240 VAC power input. Moxa 8 port RS232 desktop serial device server w/10/100, DB9M & 48 VDC power input. NPort 5600-8-DT device servers can conveniently and transparently connect 8 serial devices to an Ethernet network, allowing you to network your existing serial devices with only basic configuration. You can both centralize management of your serial devices and distribute management hosts over the network. Since the NPort 5600-8-DT device servers have a smaller form factor compared to our 19-inch models, they are a great choice for applications that need additional serial ports, but for which mounting rails are not available.
